# URANIA'S MESSENGER

### Being the second after Biffenilayou Cebis-Ylar.

To which is added a Rational Discourse of the Nature and Quality of our Minds, as they are in themselves, and as they are affected by the Passions, and by the various Objects of Sense.

By Henry Coley, M.D.

*Prasinella*, same inv.

London, Printed by George Sedgwick, for the  
Company of Stationers, 1674.

TO HIS

Much Respected Friend

Mr. JOHN EVANS

Citizen of London:

HENRY COLET

IN Testimony of Gratitude for Obligations conferred upon him,

DEDICATES

These his }  
Astronomical }  
and }  
Astrological. }  
Indeavours,

For the year of our Lord, 1674.

# Common Notes for this present Year 1674.

| 6 6 | 48 7 | 3 8 | 29 9 | 12 10 | 0 10 | 48 11 | 36 |

## The use of the Table.

You are to search into the Kalender for the day of the New Moon, full, or quarter, then account how many days your day proposed is past either of those; find that day in the upper part of the Table, and in the same Column you have the hour and minute of the Moons coming to the South (near enough for our present purpose); Then look for the Haven or Port you desire, and where the hours and quarters stand before the same, there it is high water so many hours and quarters before the time above found, but where the hours and quarters stand after the place, there it is high water so long after the time first found. *As for Example.*

The Moon being six days past the change, and so six days old, I find in the Table, that 6 days after the change, the D is 5. 48 m after 4, now a S. D makes full Sea at Quimbrough, Southampton, &c. But at Yarmouth, Dover, &c. one hour and half sooner, that is at 4 a Clock 30 m. But at London, Timmouh, &c. 3 h. after, as appears by these margin Tables.

|           |                                                              |

Shillings

1

Pounds

This Table shews the Interest of any sum of Money from 1 to a 100 l. from a day to a year. And by the help of Addition you may compute the Interest of any sum whatsoever, and note that for the greater exactness the penny is divided into a 100 parts, so that 25 parts are a farthing, and 50 parts an half-penny, and 75 parts 3 farthings, &c. *Example*, The Interest of 100 l. for six months one week and one day, is thus found by the Table.

Interest of 100 l.  $\left\{ \begin{array}{l} \text{for 6 mon. } 3-9-0-0-00 \\ \text{for 1 week } 00-2-3-61 \\ \text{for a day } 00-0-3-24 \end{array} \right\}$   $\begin{array}{l} l. s. d. \\ 7-2-7 \\ \text{half-p.} \\ 55 \end{array}$

A new Calendar for 23 years exhibiting the prime (or Golden Number) Epact, Dominical letter, Leap-years, Shrove-Sundays, and the Feasts of *Easter* and *Whitfunia*: According to the *Julian* or old Accompt.

| Anno Dom. | Prim. | Epact. | Dom. Lett. | Shrove-Sunday. | Easter-Sunday. | Whit-Sunday. |

This Table is so plain it needs no explanation more than the Titles direct.

Note that *Easter* ever falleth between the 21 of *March* and 26 of *April* Exclusive. And if the Golden Number be either 5, 13, or, 16, and the Dominical Letter G, then *Easter* day falls on our Lady day or the 25th of *March*; likewise when the Golden Number is 8, and the Dominical Letter C. *Easter* day falls on *St. Mark's*-day, or the 25 of *April*, according to the *Julian* Accompt.

*A Table of the hour of the night Correspondent to the Age of the Moon, to be found upon a Sun Dial.*

| 25  | 5  | 6  | 7  | 8  | 9  | 10 | 11 | 12 | 1  | 2  | 3  |

Age of the Moon Increasing - Age of the Moon decreasing.

The use of this Table is briefly thus, First seek the Shadow of the  $\odot$  upon the Dial, and mark well upon what hour it falls (as if the  $\odot$  did shine thereon) seek that h. at top of the Table and the age of the  $\odot$  in the first left hand column, and in the Angle of meeting you have the h. of the n. desired. *Example,* Let the shadow of the stile be supposed to fall upon 8 and the  $\odot$  12 d. old, seek therefore 8 at top and 12 in the first col. and in the Angle of meeting you shall find 6 the h. desired.

*Et sic in aliis.*

# January hath xxxi days.

First quarter the 5th day, 26 min. past 6 in the morning.  
 Full Moon the 12th day, 32 min. after 5 in the morning.  
 Last quarter the 18th day, near 10 at night.  
 New Moon the 26th day, near 9 at night.

The Face of things  
look with a good A-  
spect in the general,  
and I hope they will  
remain so.

The Heavens are in  
a very peaceable po-  
sition at present, and  
why should not the  
minds of men?

I hope the Ingenious  
and Industrious Mer-  
chant hath yet no great  
cause to Complain,  
but for the most part  
hath been generally  
Prosperous.

KING CHARLES the  
1<sup>st</sup>. Born May 29. 1630.  
His happy Restura-  
tion Aug. 1660. Crowns  
ed April 23. 1661.  
God save King  
Charles the Second.

*Pleasant summer weather, I hope may continue for many days with gentle winds and intermission of welcome showers that may refresh the Earth, which in all probability will this month be plentifully afforded in most places, and accompanied with Thunder towards the latter end.*

# July hath xxxi. Days.

Full Moon 7 day, above 10 at night.  
 Last quarter 15 day, 12 minutes past 12 at night.  
 New Moon 23 day, 34 minutes past 2 morning.  
 First quarter 29 day, 15 minutes past 5 afternoon.

*Saturnus in Aspectibus*  
 no less than five times  
 in Aspect with the rest  
 of the Planets (omit-  
 ting the ☿) and 2-  
 amongst the rest, Saturnus  
 by an ☿ and the  
 ☿ by a ☿ Aspect, to-  
 gether with the Consi-  
 deration of those  
 crowds of Aspects 2-  
 amongst the Planets  
 themselves during the  
 whole Month, must  
 needs render the Aspi-  
 cts thereof, through-  
 out Europe to be very  
 Famous and Remark-  
 able, and very Nota-  
 ble things will be  
 double's Transact-  
 ed thereby. But if  
 God be for our side,  
 who can be against us?

D. O. R. ☉ Plac. ☿ Plac. ♀ Plac. ♀ Plac. Probable Conjectures R. A.

The ☿ of h and ♂, as also the Qu-  
rate Aspect of h and  
☉, hath not yet per-  
formed their effects,  
we may be sensible  
thereof this month —  
I with the minds of  
men were better com-  
pos'd: now ♂ is up-  
on the opposite place of  
h in the Vernal Fi-  
gure, and mens minds  
are set a madding, but  
I hope the Prudence  
of the Magistrate will  
Correct their Extrava-  
gancies, as the Δ of  
the ☉ and h very  
well Intimates, and is  
Confirmed by the \*  
Sept. 3  
The Merchant hath  
good hopes of prof-  
perous returns, nor  
hath the Martiallist  
cause to complain.

R 4

# September hath xxx. Days.

Full Moon 5 day, about 4 in the morning.

Last quarter 13 day, about 2 in the morning.

New Moon 19 day, 15 minutes past 6 at night.

First quarter 26 day, 13 minutes past 4 in the afternoon.

# The Dominion of the Moon in Mans Body

Passing under the 12 Zodiack Constellations.

- ♈ *Aries* Head and Face.    ♎ *Libra* Reins and Loyns.  
 ♉ *Taurus* Neck and Throat.    ♏ *Scorpio* Secret Members.  
 ♊ *Gemini* Arms & Shoulders.    ♐ *Sagittarius* Thighs & Leggs.  
 ♋ *Cancer* Breast and Throat.    ♑ *Capricorn* the Knees.  
 ♌ *Leo* Heart and Back    ♒ *Aquarius* the Leggs.  
 ♍ *Virgo* Bowels and Belly.    ♓ *Pisces* the Feet.

The Aspects of the Planets both Old and New.

|                                                          | S. | D. |
|----------------------------------------------------------|----|----|
| ♄ <i>Conjunction</i> , in the same sign and degree       | 00 | 00 |
| ♅ <i>Semisextile</i> , when Planets are distant 30 D. or | 01 | 00 |
| * <i>Sextile</i> , when they are distant 60 d. or        | 02 | 00 |
| ♆ <i>Quintile</i> , when distant 72 d. or                | 21 | 12 |
| ♁ <i>Quartile</i> , when they are distant 90 d. or       | 13 | 00 |
| ♄ <i>Tredecile</i> , when they are distant 108 d. or     | 03 | 18 |
| ♄ <i>Trine</i> , when they are distant 120 d. or         | 04 | 00 |
| ♄ <i>Siquintile</i> , when distant 140 d. or             | 04 | 24 |
| ♄ <i>Quincunx</i> , when aunder 150 d. or                | 05 | 00 |
| ♄ <i>Opposition</i> , when distant 180 d. or             | 06 | 00 |

The Characters of the seven Planets.

♄ *Saturnus*, ♃ *Jupiter*, ♂ *Mars*, ☉ *Sol*, ♀ *Venus*, ♀ *Mercury*, ☾ *Luna*, ♉ *Dragons Head*, ♏ *Dragons Tail*.

Upon the twelve Signs.

Majestick *Aries* clad in's Golden Wooll,  
 Commands the Head and Face : The Zodiacks Bull  
 Rules Neck and Throat : the Arms and Shoulders ly  
 Subjected to the Zodiacks *Gemini*.  
*Cancer* the Breast and Stomach do obey.  
 And Regal *Leo* o're the Heart doth sway  
 His Royal Scepter, whilst the wanton Maid  
 Claimeth the Belly. Reins and Loyns are way'd  
 By the Celestial *Libra*. Secrets are  
 The Poisonous *Scorpions* : And the Thighs the share  
 Of *Sagittarius* : But the feeble Knees  
 Fall to the Goat : The Leggs are standing Fees  
 Unto *Aquarius* ; whilst the Feet do bend  
 Their steps to *Pisces*, and Assign an    E.N.D.

Coley, 1674.

## Astronomical and Astrological Observations for the Year, 1674.

**T**Hough Envy Bluster, and, to Trap me, lay  
A Thousand Plosts, I'll still keep on my way;  
The snarling Scorpionist (whose base design  
Was, with a senceless Charge, to undermine  
My Credit, and to vent his causeless Spleen  
Over anothers head gave Fire, unseen)  
Has made himself Ridiculous enough,  
For Innocence is more then Cannon proofe:  
Let such Huff on, and Censure me, or This;  
I slight their Plaudits, and Condemn their Hiss:  
But to my Friends, and the true Sons of Art,  
With all respect, my Labours I'll impart;  
Beg their Perusal, and, if Faults they spy,  
To wink them o're with an Indulgent Eye:  
Such Candour will my Studies much Affect,  
To offer something next year more Correct.

Jacula Prævia minus ferunt.

**A**Rts and Sciences Mathematical, Taught at my House  
at the further end of Rose and Crown Court, near  
Baldwins-Gardens in Grays-Inn-lane; viz. Arithmetick both  
Vulgar, Decimal, and Logarithmical, Geometry, Tri-  
gonometry, Astronomy, the use of the Celestiall and Ter-  
restrial Globes, Dialling, Surveying, Gauging, Measuring,  
with the Art of Astrology in all its Parts, by the Author  
hereof,

HENRY COLLET.

C

A

Coley, 1674.

A brief Chronology of things memorable  
since the Birth of Christ.

|                                              |      |
|----------------------------------------------|------|
| <b>T</b> he Birth of Christ,                 | 1674 |
| Christ <i>suffered upon the Cross,</i>       | 1641 |

**Coley, 1674.**

R. A. 247. 30.

R. A. 67. 30.

By a careful Collection of Testimonies from the Schems of the New  $\gamma$  Preventional; the  $\odot$  Ingress, and the Full  $\gamma$  Postvenional, I find the Fortitudes and Debilities of the Planets as they are Express'd in this subsecent Table.

*Fortitudes.*

|                                    | $\gamma$ | $\gamma$ | $\odot$ | $\odot$ | $\gamma$ | $\gamma$ |
|------------------------------------|----------|----------|---------|---------|----------|----------|
| Ingress of the $\odot$ in $\gamma$ | 8        | 7        | 6       | 5       | 4        | 3        |
| New $\gamma$ Preventional          | 0        | 6        | 6       | 8       | 12       | 4        |
| Full $\gamma$ Postvenional         | 16       | 8        | 6       | 7       | 10       | 4        |
| The sume of their Fort             | 24       | 21       | 18      | 26      | 27       | 22       |

*Debilities.*

|                                    | $\gamma$ | $\gamma$ | $\odot$ | $\odot$ | $\gamma$ | $\gamma$ |
|------------------------------------|----------|----------|---------|---------|----------|----------|
| Ingress of the $\odot$ in $\gamma$ | 4        | 5        | 0       | 5       | 9        | 5        |
| New $\gamma$ Preventional          | 5        | 0        | 5       | 0       | 0        | 9        |
| Full $\gamma$ Postvenional         | 4        | 0        | 10      | 8       | 5        | 0        |
| Hence their streng. app.           | 11       | 16       | 3       | 13      | 13       | 8        |

Thus from the aforesaid Collection, ♀ appears to be Chief Ruler or Almuren of the whole Year, as surmounting all the rest of the Planets in Essential Dignities, in the Principal (*viz.* Hylegiacal) places of the three Schemes before Exprest; but ♀, ☉, and ♀, claim a very considerable share also in the Dominion of the Year, by reason their Testimonies of Strength are almost Equal. This being premised, I proceed in the next place to an Astrological Judgment of the precedent Figure, according to the Canons and Aphorisms of Astrologie laid down by the most Authentick Masters thereof.

Most Authors concur in this Opinion, that, if in the Vertical Figure a fixed Sign ascend (as in this present Ingress) that then there is no necessity of Inspecting the Schemes of ☉ Ingress into the other Cardinal points, upon which consideration I shall content my self with the view of this present Position, with respect had to the precedent and subsequent Lunations, — In the Figure of the New ☾ conventional 26 degrees of that *Regal* fixed sign ♄ doth arise, and Royal ☉ Lord of the Horoscope, doth friendly salute the benevolent Planet ♀ by a trine Aspect. ♀ is posited in the 4<sup>th</sup>. house, or North Angle, *Saturn* in the 9<sup>th</sup>. House, *Mars* in the 5<sup>th</sup>, the *Sun* and *Moon* in ☊ in the 8<sup>th</sup>. in ☋, and ☿ and ♀ in ☌ in the 7<sup>th</sup>. house. In the Full ☽ Postventional, another fiery sign Ascends, *viz.* 10 d. of ♄, ♀ Lord thereof: Retrograde in ♍ in the 11<sup>th</sup>. house, ♂ is intercepted in ♍ in the 2<sup>d</sup>. house, there conjoynd with ☌, ♀ Lady of the 10<sup>th</sup>. in her Exaltation in the 3<sup>d</sup>. house; the ☉ and ☿ conjoynd in ♍ in the 3<sup>d</sup>. also, and the ☾ keeps her Court in the 9<sup>th</sup>. house.

But in the Scheme of the ☉ Ingress ≈ a fixed Aereal sign Ascends, and ♀ and ☿ Intercepted in the house of ♀ in the East Angle, ♀ is near the Cusp of the 9<sup>th</sup>. house Retrograde in ♍, but casts a friendly Δ to ♀ in the Ascendant, and the ☾ in the 7<sup>th</sup>. applies to a ✱ of ♀ and afterwards deflects to an ☌ of ♀ and ☿, ♀ in his fall in ♍ in the 2<sup>d</sup>. house, ♂ in the 12<sup>th</sup>. in ✱ to ☿, and ☿ in ☌ of the ☉ *cum multis aliis*. All which barely considered, signifie no such Constaernations amongst us, as some are

pleased to suggest; whatever Occurrences may happen in other parts of the world. — 'Tis true.  $\gamma$  is now in  $\gamma$  and hath lately met with several  $\delta$ s of  $\gamma$ , with whom in October 1663. he was in  $\delta$  in  $\gamma$  a sign of the fiery Triplivity: We labour now under their Effects, and by Experience can testify, that those superior bodies have a powerful Influence upon all the Inhabitants of this Inferiour Orb, — God direct us and in His good time compose the greatest Differences, and Antipathies that are now in being in several parts of the World. 'Mr. Rich. Edlin in his *Prædictus Sydereus*, pag. 113. speaking of the year 1674. hath these words — *Anno 1674. upon the 8th. of July,*  $\gamma$  and  $\delta$  make  $\delta$  in the 28 d. of  $\gamma$  (the place of the  $\odot$  in the  $\delta$  of  $\gamma$  and  $\gamma$  in  $\delta$  1663.) and in the Mid-heaven of the great Conjunction in the Year 1623. This (saith he) portends to some great Persons either Death or Detriment, especially those (or in those places) under the dominion of the sign  $\gamma$  by some Domestique difference amongst themselves, Murthers, Slaughters, and cruel hatred amongst them generally: The  $\odot$  is applying to a  $\square$  of both Planets, which aggravates the evil to Persons of High degree.

'But towards the latter end of the Year the  $\Delta$  of the  $\odot$  (by Direction) denotes a discovery of some affairs that for some time have been Obscured; Kings and their Subjects do better agree: Some are preferred to great Honour and Dignity in Publick Affairs, beyond Expectation even from low Degree, others that have been far more Factions, Turbulent and Unsettled in mind, do upon this Direction become Conformable and more Obedient to their Superiours. — Thus far that Ingenious Author, I proceed to the Revolution again, which (as I have heretofore hinted) is not a sufficient Foundation to Build a Judgement upon for the ensuing Year; there are many other things to be considered, which those that have made any considerable progress in these Studies are very sensible of; divers Intricacies, ought to be warily searched into by him that would be a curious Scrutator, and desires to dive deep into the Mysteries of Nature; However I shall not attempt

tempt to move beyond my own Sphere, I shall rather choose  
 to steer my Course along the Shore side, then too Rashly  
 adventure to Launch out into the dangerous Ocean. But I  
 have digressed. — I return again to the consideration of  
 the Scheme, which promises Advantage to the Industrious  
 Merchant by prosperous Voyages to Sea, and happy Re-  
 turns home again. This I judge by the position of  $\psi$  so  
 near the Cusp of the 9th. there in  $\Delta$  to  $\odot$  in the Ascendant  
 from signs (accounted by all Astrologers) of the watry  
 Triplicity, nor doth it portend any disadvantage to the Peo-  
 ple in general, but the Contrary, let them be careful they  
 prove not enemies to themselves, and their own Interests,  
 and doubtless then they may be reasonably happy,  $\psi$  in  
 the second, if he were strong and potent, and well beheld  
 by his dispositor, signifies the prosperous Condition of the  
 People in general,  $\psi$  is in his fall, 'tis true, but hath many  
 Dignities in the Hylegical places of the aforementioned  
 Schemes, and therefore I hope the latter end of *Haly's*  
 Aphorism *Parte Octava, Chap 7. Judic. Asterorum* may not  
 fully take place, — *Si quando Saturnus fuerit in secunda*  
*domo, &c.*  $\psi$  in the second and the Lord thereof in friend-  
 ly Aspect unto him, denotes success to the people in gene-  
 ral in their Merchandizing and Professions: And that they  
 should thereby Thrive and grow Rich, especially by such  
 things as are signified by the sign he is in. But if he be  
 therein Infortunate he signifies Poverty, Losses and Crosses,  
 &c. Under the sign  $\gamma$  all Authours affirm is, *England,*  
*France, Germany, Swethland, Poland, Denmark, &c.* From  
 Penury, Scarcity, and Want, *Libertas nos Damini.* If some  
 persons receive damage through their own profuseness, let  
 such look to it: All are not born to be Rich, the Scale is  
 continually turning, some increase in Estate, others decline,  
 and Riches and Honour are the most uncertain Compani-  
 ons. The year in general seems by the Position to be no  
 way considerably dangerous as to any Contagious Distem-  
 per that may Tyrannize amongst the people; the Figure ra-  
 ther shews Salubrity in general, and a wholesome serene  
 Air (for the most part) during the whole Revolution: Nor  
 do I discover any considerable Injury from our most Potent  
 Adver-

Adversaries, I presume there can be no great danger (according to the stream of Natural causes) for the ☉ (the Principal Significator of an Adversary) is in the Ascendant in friendly \* to ☿ his Dispositor, and the ☾ in the 7th. applies to the same Aspect of ♃, who is chief ruler of the Angle of Honour: The most considerable Action may be in *June* and *July*; for in *June* ☿ passes over the places of the ☉ and ♀ in the Revolution, and in *July* ☿ and ♀ meet in ☿ in ♀ and suddenly after cometo a ☐ of the ☉, as before was intimated, and such Configurations, where there is fit matter to work upon, usually produce Action; however I shall not be positive, but modestly Conjecture. To conclude the ☉ in the Ascendant, shews a prosperous year in general, especially if he be free from Affliction and essentially dignified as here in our Figure: This is the Judgment of *Italy*, and of *Guido Bonatus*, whose words are these: *Si autem fuerit Sol in Ascendente hora Revolutionis liber a malis, & aliis Impedimentis, & fuerit cum hoc Dominus Anni seu Revolutionis significat bonum esse divitum & magnatum seu Nobilium & eorum gaudium & augmentationem boni etque profectum rerum, & si fuerit receptus significat ablati-onem mali.* — Thus much upon the Vernal Figure in general, consult particulars in the monthly Pages.

*Grim weather-beaten Hyems now Retreat,  
withdraw thy Chattering Teeth, and leave thy Seat;  
For hire thy Rugged, Frozen, Ill-look'd Face,  
And Ragged, Thread-bare Coat (the Springs disgrace)  
Is out of Favour and of Fashion both,  
Since now Aurora hath renew'd her Youth,  
By meeting with the favour of the Sun,  
(The Worlds bright Eye) whose winter-course is Run;  
And he Return'd to beautifie the Spring,  
Reviving and Refreshing every thing.  
who with his Gentle Beams doth now restore,  
what Charlish Hyems had much Cruelty before:  
Recover weakened Nature to her strength,  
Making both Night and Day of equal length.*

**S***olstitium Aestivum*, or the Summer Quarter, always Commences when the ☉ enters the first Scruple of the Tropical sign ♋, having then made his farthest Perambulation Northward, making longest Days and shortest Nights to us, and the contrary to those that dwell Southward of the *Aequinoctial*; which this year happens June the 11th. one minute after seven in the Morning, and now the ☉ hath his greatest Amplitude of Rising and Setting from the East or West points of the *Horizon*, as also his highest Meridian Altitude. The state of this Quarter will (for the most part) be very various as to the Weather, and Actions of Men in the world: Expect brisk Winds, sudden Showres, accompanied with Thunder and Lightning, yet I hope not much prejudicial to the Fruits of the Earth which now seem to be in a very hopeful and prosperous Condition, to the great Satisfaction of the Industrious and Laborious Husbandman.

*Replendent Sol new in his highest Seat  
Of his North Declination doth Retreat  
To the Aequator, whilst here enters in  
Æstas (the Summer) richly Cloath'd in Green.  
whose graceful Presence gladly we Embrace,  
And Madam Nature (proud of such a Face)  
Her Brow with Ornaments of Beauty Dicks,  
Paints Roses and Carnations in her Cheeks:  
But she thus flourishing in highest Pride,  
Of Great (though Fading) Glory is Espied;  
And quickly by the Sythe and Sickles fury,  
Spoyl'd, Rob'd and stript of Beauty, wealth and Glory.*

Of Autumn, or Harvest.

**E***quinoctium Autumnale*, or the Autumnal Quarter, begins this year September 12th. 10 h. 35' P. M. at which moment, Illustrious Titan (that glorious Lamp of Heaven) enters the first Scruple of the *Aequinoctial* sign ♎ whereas the Earth at the same time (according to the Copernican System) touches the first point of the Opposite sign ♋: The ☉ hath now again neither Declination from the *Aequinoctial*, nor Amplitude from the East or West points of

Colley, 1674.

of the Horizon, but Rises in the East, and Sets in the West, making the Days and Nights equal, as in the Spring Quarter, &c. This Season (for the most part) should be cold raw uncertain Weather, many blossoming high Winds and some Frost accompanied with Snow and moist Weather.

Titon (*in his Return*) doth now *Reisen*,  
His Splendor to the Equinoctial Line;  
Making the Days and Nights again agree,  
Exactly in Proportion, whilst that we  
Meet Autumn Entering with a new Recruit,  
Bringing the Rear of Harvest up with Fruit.  
Of several sorts presenting us the Gain,  
Of such charg'd Stores and Barns well cramb'd with Grain;  
Where there's Return'd a large Gratuity,  
To th' Painful Hand for its great Industry;  
Though idle Drones therein deserve no Share,  
Who thereto lend nor helping Hand, nor Care.

Of the Winter Quarter.

Solstitium Hyemale, or the Winter Quarter, takes its beginning this year December the 11th 10 m. after 10 of the Clock in the Morning, at which moment the ☉ touches the first Scruple of the Tropical sign ♋, thereby producing our shortest Day and longest Night, and the contrary to those that Inhabit the Southern side of the Equator: Now the ☉ hath his greatest Southern Declination from the Equinoctial and least Meridian Altitude; At which time he also attains his greatest Southern Amplitude from the East and West points of the Horizon. This Quarter expect store of Wind, Snow and moist Weather, intermixt with some Frost, suitable to the Season.

Bright Titon now withdraws his Powers,

No Plant for Cold can Grow:

The pleasant Fields instead of Flowers,

Are all Adorn'd with Snow.

The Trees have lost their Cloaths of Green,

They've cast their Fruits away,

No Flower or Leaf is to be seen,

But all seems pin'd away.

of

Of the Eclipses of the Luminaries, that happen this present Year, 1674.

I've times this Year will the ☉ and ☾ be Eclipsed, thrice the ☉, and twice the ☾. The first of the ☉ will be Jan. 26. 8 h. 52' P. M. visible at the Cape of Good Hope, California, New Britain. The second Eclipse of the ☉ happens July 23. 2 h. 35 m. in the Morning, visible at the Cape of Good Hope, New Holland, China, and the South Sea. The 3d. of the ☉ will be a very small Eclipse Decemb. 19. near 5 in the Morning, invisible to us: The first Eclipse of the ☾ will be Jan. 11. 17 h. 32' P. M. visible in the Tartarian Ocean, Natolia, Mediterranean Sea, Egypt, and the Pacifick Sea. The 2d. Eclipse of the ☾ happens July the 9th. 9 h. 35' P. M. visible in Japan, Lythuania, Moscovy, Poland, Germany, Barbary, Guiny.

Of the Transits of the Planets in any Nativity.

THE last year I published something of the Nature and Effects of Directions in Nativities, from the Learned Morinus, and now to gratifie the younger Sons of Art, I have Adventured to Communicate something of Transits also from that Learned Author, which be pleased to take as followeth.

The Doctrine of Transits is the last, but not the least Part of Astrologie, for since of every particular Effect, as such, proceeding from Caelestial causes, there must be a particular Actual Caelestial cause, which cannot be the Scheme of Birth, nor its Directions, since all these at least in respect of future Accidents are Potential causes subordinate each to other, and some of them Superiour and more Universal than others, tending in order to some particular cause which is wholly Actual, and by which that which in them is Potential may be brought forth into Act, and such is the Transit of Planets by apt places of the Radical and Revolutiounal Figures.

In a Planets Transit three things are especially to be observed. (1.) Its proper Nature, not only whether Benevolent or Malevolent, but also whether it be ♀ or ♂, ♀ or ♂ each of which have their respective proper Natures, though the first two be Benevolent as the last are Malevolent. (2.) Its Radical determination, for according to that chiefly it operates in its Transit, and therefore the Transit of ♂ who was in the Radix determined concerning Death or Diseases, as being possessed in or Lord of the 8th. 6th. or 12th. houses, is very dangerous

gerous by the Natives Life or Health, &c. (3) Its state and condition at the time of the *Transit*, whether agreeable with or contrary to its Radical signification & its combination with the signification of the place it *Transits*, as also whether it be strong or weak; for when it shall be found agreeable and strong either for good or evil it will A& strongly, but when Incongruous or weak, little or nothing at all. Nor are these things to be heeded only in the Planet *Transiting*, but also in the Planet or Cusp by whose place the *Transit* is made: For as the signs determined at the beginning of the World to the Natures of the Planets A& in dependance to the state of their Lords, so the Places of Heaven in the Radix peculiarly determined by the Planets, assign the Native during his Life in dependance to the state of such Planets to determining; and therefore the *Transit* of ♃ by the *Horoscope* of the Radix at a time when ♀ Lady thereof is Peregrine, Retrograde, or Afflicted by the Malignant Ray of ♃ and ♄, will be of very little or no advantage to the Native.

But since the chief foundation of this Learning concerning *Transits*, is to apprehend how a Planet passing by that place which was one of the Cusp's (especially if a Cardinal one) of the Genethiacal Figure, or which another Planet at the hour of Birth did possess, should come to A& according to the particular signification in the Radix of such place or Planet, though now at the time of the *Transit* the Planet which so occupied that place be absent. *This very Consideration hath Tortur'd the wits of divers Students*, and therefore we deem it necessary first to explain, and to that purpose offer thus, viz. Natural effects proceed not from the first Heaven (or *Primum Mobile*) alone, for that being an universal Cause, is of it self determined to no particular species of effects: Nor from the Planets alone, for we see ♄ does one thing in, or rather with ♃, and another in or with ♀, &c. but from a mutual Concurrence both; wherein yet the Heaven claims the principality, without which though the ☉ and all the other Planets should remain, yet Nature would Droop and Languish for want of its formal Virtue, which like a soul or spirit enlivens and conserves the whole Corporeal World. Now although this first Heaven be ever the same to all things in its Nature and formal Virtue, which is Immutable, yet doth it not continue so in respect of the Continuation of its parts, which are continually varied by its

its motion, the cause therefore as from the *Primum Mobile* of the different Effects in men, is its divers situation in respect of several men. at the moment of their Birth respectively, of whom one perhaps hath  $\gamma$  in the Ascendent, another  $\delta$ , &c.

The same may be said of every Planet, which at the same time is the same to all sublunary Subjects in its nature and universal Virtue, but divers in site or position, whereby its universal Nature being diversly determined in respect of the several Natives, produces in every of them at the same instant divers Effects; and doth also determine that part of the first Heaven under which he is beheld from the Earth, to his own nature and virtue, both as well essential from its proper Nature, as accidental which it acquires by its present position in respect of the Native; and this done so powerfully, that such a part of Heaven wherein for example, the  $\odot$  is so beheld, becomes to the Native during his whole life, as it were another  $\odot$ , and is in the same manner determined by the house of the Figure, as the  $\odot$  it self was in the *Genesis*, where it may not undeservedly be said, that in the Impression of the Coelestial Constitution which the Native receiveth at Birth, a Planet is a certain proportional medium between Heaven and the Native, which Connects and Conjoyns them both together, whereby the Native contracts such a Sympathy and Antipathy with Heaven, that, as his production, so his conservation, depends on, & consists in such Situation of the Coelestial Bodies in respect of him, and consequently his alteration and corruption must proceed from some contrary Constitution, or repugnant Situation. For look what Planet & Sign by Body, dominion or Aspect possess each house at Birth, such both Active and Passive power doth the Native receive as to the accidents signified by that house, and such a sympathy with that Coelestial Constitution, that as often as any change happens therein, so oft there will happen to the Native some mutation in the thing or kind of Accident signified by that house, if at least such change were agreeable to the Directions and Revolutions then Operating. The Planet *Transiting* moving and exciting all the causes of such effects, both active and passive, whether intrinsic to the Native, or extrinsic in universal Nature, so that some things happen to the Native of that kind of signification, belonging to the place by which the *Transit* is made; where we are to observe that a Planet *Transiting*, and place *Transited*, do mutually determine

mine each other concerning the Native: As first for Example, ♂ Lord of the 8<sup>th</sup>. passing by the place of the Ascend. and its Lord deter. them not only simply to martial Nature, but also to death or danger of life, because ♂ by his Rad. Deter. contraſted the power of death againſt the Native, which he cannot more efficaciously exercise then by paſſing, by Body or Inimical Ray, the places of the Rad. Fig. deter. to life, viz. That of the Horosc. and its L. For when Rad. places by a *Transit* are deter. to contrary ſignification, then hath the Nat. reason to fear a great change *Radically* ſignified.

Therefore whilst he *Transits* the ſignificators by Body or ill Aspect, he is by them ſeverally Deter. as to the manner or kind, whereby the *death* or *danger* of life by him ſignified ſhall happen; and therefore when he *Transits* the *Horosc.* he is deter. to exercise his *killing* or *morbifick faculty*, by means of the *temperament*, *manners*, or *ingenuity*; when the Midh. then by means of *actions*, *undertakings*, or *dignities*, as it happens to Capt. when they lead on their Souldiers to *Battle*, &c. In the next place I ſhould have Inſerted ſeveral *Apophiſmes* of *Transits*, but being Limited, I muſt reſerve them till the next Opportunity.

Partwel my little Bark! thy Voyage take,  
 weigh Anchor, quit the Shore and all Sail make,  
 If ſome bold Caper meet thee on the Main,  
 Pour in Broadſides, and Beat him back again.  
 Thy Cargo's truth, dread not baſe Envy's rage,  
 Bear up, though he have got the weather-gage.  
 Yet let the proud Inſulting Rover know,  
 Thou ſcorn'ſt to Strike or Truckle to a Foe,  
 Look to thy Tackle, ſee thy Keel be ſite,  
 And then thou may'ſt deſte his greateſt ſight.  
 who ſtill Lays wait where-ever thou art Bound,  
 To ſplit thy Main-Maſt, and run thee a-ground.  
 Though by th Event perhaps it may be known,  
 Thy Pilot's no leſs ſkilful then his own:  
 Fear not, if he attempt thee to Engage,  
 And give him Bounce for Bounce in every Page.  
 But to my Friends, I wiſh good Health as mine is,  
 And of a conſtant Happineſs no ———

Laret Anguis in Herba.
